

LCWD 2016 Drinking Water Quality Report

The Lynnfield Center Water District has mailed a copy of the 2016 Drinking Water Quality Report to each customer with their June water statement. An electronic PDF® copy is available at the District's site www.LCWD.US on the "Quality" page. Paper copies are available at the office.

The report provides consumers with important information about the public water supply source, testing results, lead & copper content, health and safety standards, treatment process, and chemicals added. Each consumer is encouraged to read the report and visit the District's web site.
