

## **LCWD Outside Water Use Restriction**

The **Lynnfield Center Water District** is raising the level of restriction on outdoor watering to a Level 3. During a Level 3 restriction, outdoor lawn and garden watering is permitted two days per week – Tuesday's and Saturday's, between 8 PM and 6 AM. The move to a Level 3 restriction was triggered by the stream flow in the Ipswich River. This action is effective immediately due to the Water Management Act Permit conditions required by the Massachusetts Department of Environmental Protection. These restrictions are also necessary for the District to maintain an adequate water supply for fire protection and domestic use. Violations of the restrictions are subject to a fine or fines.

Robert B. Almy, Chairman  
Board of Water Commissioners
